Amr Hares Abdelaal

Full-Stack Software Engineer — AI, LLMs & Automation Systems

Giza, Egypt · +20 114 815 8212 (WhatsApp) · +20 103 425 4201 · bashar56789@gmail.com · github.com/AH64-dll

Summary

Full-stack software engineer and Computer Science student at FCAI, Cairo University, focused on AI: LLM agents, MCP tools and automation systems. Freelancer who ships typed, tested software in TypeScript and Python, from browser extensions and CLI tools to web and mobile apps. My open-source AI video editor has 58 stars on GitHub.

Projects

NAVI — Browser bridge for CLI AI agents · *TypeScript, Node.js, Chrome Extensions (MV3)*

- Designed and built a system that lets a terminal AI agent work safely inside the user's own Chrome browser, on top of the open-source Pi agent harness.
- Built the full chain: CLI server, private local socket, native-messaging connector, extension service worker, content script and consent popup.
- Wrote a versioned message protocol with strict runtime validation and fixed size limits, plus an explicit, revocable permission model.
- Covered protocol, transport, security and browser logic with 11 automated test suites.

OpenEdit — AI-native video editor · *Python, MCP, ffmpeg* · **58★, 6 forks**

- Built a video editor that AI assistants control as a local MCP server: ingest, transcription, edit graph, rendering and quality checks.
- Runs on Linux and Windows; adopted by other developers on GitHub.

Daleel El-Togar — Merchant lookup platform for Egypt · *TypeScript, Cloudflare Pages* · **live**

- Built a public search site where shoppers look up a seller by name, Egyptian phone number or page link and see dated public evidence about them.
- Bilingual (Arabic / English) with records browsable by governorate; shows sources and unknowns instead of star ratings.

Miskova — Luxury perfume e-commerce store · *Next.js 16, React 19, Three.js, Tailwind CSS* · **live**

- Built a storefront with a real-time 3D product bottle, cart drawer, and checkout with Egyptian phone validation, server-side pricing and WhatsApp order confirmation.
- Added a password-protected admin dashboard with HMAC-SHA256 signed sessions for managing order status.

Prayer Companion — Islamic prayer app for Android · *Flutter, Dart* · **on Google Play**

- Built and published an Arabic app for keeping up with the five daily prayers: location-based prayer times with check-ins, points and streaks, a Quran reader with recitation audio, adhkar, a tasbeeh counter, khatmah tracking and group features.

Rental Ledger — Rental tracking app · *TypeScript, Android*

- Built and shipped an Android app (APK) for tracking rentals and payments.

ADHD Reminder — Focus app for desktop · *Rust* · **4★**

- Built a quiet goal reminder for Linux and Windows with random or fixed check-in timers, login startup, crash recovery and installers.
- Keeps all data on the device: no account, analytics or network service.

Other: browser-automation-toolkit (Python browser-automation tools, no Selenium)

Experience

Freelance Software Developer — Remote · 2025 – Present

- Build websites, automation tools and AI integrations for clients, from first prototype to delivery.
- Delivered the Miskova perfume store end to end, including its order flow and admin dashboard (see Projects).
- Built a creative portfolio site for a designer and animator, and five landing-page prototypes for an Arabic literary library.
- Develop Python automation and browser-automation tools (Chrome DevTools Protocol) for data collection and repetitive workflows.

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, C/C++, Dart, Rust, C#, SQL
- **Front end:** React, Next.js, HTML/CSS, Flutter, Chrome extensions (MV3)
- **Back end & tools:** Node.js, REST APIs, Git, GitHub Actions (CI/CD), Linux, ffmpeg
- **AI & automation:** LLM agents, Model Context Protocol (MCP), multi-provider LLM APIs, browser automation (CDP), web scraping
- **Practices:** automated testing (pytest, node:test, Vitest), type-safe code, technical documentation

Education

Bachelor of Computer Science — Faculty of Computers and Artificial Intelligence (FCAI), Cairo University · 2023 – Present

- General program.

Languages

Arabic — Native · English — Fluent
